Amendment of the Specification:

Paragraph [0001] of the specification has been amended to correct a typographical error. There was a transposition of two numbers in the recitation of the serial number of parent patent application serial number 08/465,679. The serial number of this application was correctly listed on the Initial Application Data Sheet filed on February 22, 2002. According to 37 C.F.R. § 1.76(b)(5), the application data sheet constitutes the specific reference required by 35 U.S.C. 119(e) or 120, 37 C.F.R. § 1.78(a) (2) or 37 C.F.R. § 1.78(a)(4) and no other claim to priority need be made in the specification. The present amendment is intended only to correct a typographical error in paragraph [0001] so that the information relayed in paragraph [0001] is in keeping with the priority claimed in the Application Data Sheet. Applicants respectfully request entry of this amendment.

same typographical described above was made on page one of the sequence listing.
Support for this amendment is in the Initial Application Data Sheet filed February 22, 2002.

Additionally Applicants have updated the <140> line to reflect Serial Number accorded the present application.

Applicants respectfully request that the substitute sequence listing be entered and made of record. Submitted herewith are Statements Under 37 C.F.R. § 1.825(a) and (b).
